(54) Title: CONNECTOR

500

(57) Abstract: A connector (10) for electrically connecting two electrical points (44, 45), the connector having one or more con-
nector terminals arranged in a connector housing (20), the connector terminal comprises a resilient arm portion (32) which bends
or deflects about a first pivot portion (34) when the connector terminal is compressed initially and resilient arm portion bends or
deflects about a second pivot point (35) when the connector terminal is further compressed subsequently.
